Olson, Robert and David Rejeski, eds. *Environmentalism and the Technologies of Tomorrow: Shaping the Next*

Industrial Revolution. Washington: Island Press, 2005.

> *Environmentalism and the Technologies of Tomorrow* is a collection of essays by leading scientists, technologists, and thinkers that examine the nature of current technological changes, their environmental implications, and possible strategies for the transition to a sustainable future. It offers a baseline understanding of new technological developments, as well as important insights for moving beyond business-as-usual by developing more anticipatory approaches to environmental protection and more comprehensive strategies for promoting the transformation of technology. — Island Press website .
