Carbon Nation

Byck, Peter. *Carbon Nation*. Louisville: Earth School Educational Foundation Inc., 2010. 35 mm, 86 min. https://youtu.be/eLs73KJI36w.

> *Carbon Nation* is a documentary movie about climate change solutions. Rather than highlighting the problems with the use of fossil fuels, the film presents a series of ways in which the world's need for 16 terawatts of energy per year can be met while reducing or eliminating carbon-based sources. It contains optimistic interviews with experts in various fields, business CEOs, and sustainable energy supporters to present a compelling case for change while having a neutral, matter-of-fact explanation.
