Soluri, John, Claudia Leal, and José Augusto Pádua, eds. *A Living Past: Environmental Histories of Modern Latin America*. New York: Berghahn Books, 2018.

Though still a relatively young field, the study of Latin American environmental history is blossoming, as the contributions to this definitive volume demonstrate. Bringing together thirteen leading experts on the region, *A Living Past* synthesizes a wide range of scholarship to offer new perspectives on environmental change in Latin America and the Spanish Caribbean since the nineteenth century. Each chapter provides insightful, up-to-date syntheses of current scholarship on critical countries and ecosystems (including Brazil, Mexico, the Caribbean, the tropical Andes, and tropical forests) and such cross-cutting themes as agriculture, conservation, mining, ranching, science, and urbanization. Together, these studies provide valuable historical contexts for making sense of contemporary environmental challenges facing the region. (Text from Berghahn Books)
