H-Environment is a network of scholars and others interested in the rapidly growing field of Environmental History. Part of [H-NET](#) , the Humanities & Social Sciences Online initiative, H-Environment is supported by organizations of professional historians including the [American Society for Environmental History](#) and the [European Society for Environmental History](#) . Environmental historians seek an understanding of the range of human interactions with the physical environment in the past. H-Net is an international consortium of scholars in the humanities and social sciences that creates and coordinates electronic networks, using a variety of media, and with a common objective of advancing humanities and social science teaching and research. H-Net was created to provide a positive, supportive, egalitarian environment for the friendly exchange of ideas and scholarly resources. H-Environment is edited by field experts approved by the network board and certified by H-Net's Executive Council. (Text adapted from [H-Environment: About this Network](#))

The [H-Environment Resources](#) page collates journals and articles, cross-network projects, and research resources. The [Reviews](#) section features reviews of popular and contemporary titles in Environmental History, and [discussions](#) can be initiated by members.
