"Goats, Marginality and the 'Dangerous Other'"

Siddle, David

Siddle, David. "Goats, Marginality and the 'Dangerous Other.'" *Environment and History* 15, no. 4 (Nov., 2009): 521–36. doi:10.3197/096734009X12532652872117 . Mediterranean vegetation is increasingly subject to high summer temperatures. Scrubland grazing by the omnivorous goat (*Capra hircus*) could reduce the risk of widespread fires. But goat populations have been controlled by bans and restrictions for many centuries. The political, economic and cultural reasons why the animal had such an unsavoury reputation are explored.
