"The Origin and Construction of Knowledge"

Williams, Michael

Williams, Michael. "The Origin and Construction of Knowledge." *Environment and History* 10, no. 2, "The Nature of G. P. Marsh: Tradition and Historical Judgement" special issue (May 2004): 127–131. In essence the core of these five papers is the question of the origins and 'construction' of knowledge. Each paper seeks to question the 'originality' of George Perkins Marsh in his *Man and Nature*, and more specifically David Lowenthal's assessment of Marsh's ideas on the environment in his magnificent biography of Marsh.
