McNeill, John R. Review of *El metabolismo de la economía española: Recursos naturales y huella ecológica 1955–2000* by Óscar Carpintero. *Global Environment* 1 (2008): 216–23.

John McNeill reviews economist Óscar Carpintero's history of resource use in the Spanish economy. His verdict: "It will be quite some time before anyone needs to write another history of resource use in the Spanish economy in the second half of the twentieth century. Carpintero has covered the subject in great detail and with great insight."
