"The Effect of the Israeli-Palestinian Conflict on the Water Resources of the Jordan River Basin"

Ferragina, Eugenia

Ferragina, Eugenia. "The Effect of the Israeli-Palestinian Conflict on the Water Resources of the Jordan River Basin." *Global Environment* 2 (2008): 152–70.

The article analyzes the interaction between security and environment in the Mediterranean, focusing on the paradigmatic example of the Israeli-Palestinian conflict over water resources in the Jordan River basin. Control of water can hardly be considered the main cause of conflict between Israel and Palestine, but it certainly has increased the potential for conflict and had a long-term negative effect on the environment. (Text part of the [author's abstract](#).)
