Brook, Isis. "Can Merleau-Ponty's Notion of 'Flesh' Inform or Even Transform Environmental Thinking?" *Environmental Values* 14, no. 3 (2005): 353–62. doi:10.3197/096327105774434468.

Reference to Merleau-Ponty's ideas surfaces in environmental thinking from time to time. This paper examines whether, and in what way, his ideas could be helpful to that thinking. In order to arrive at a conclusion I examine in detail and attempt to clarify the notions of 'Flesh' and 'Earth' in order to see if they can carry the meanings that commentators sometimes attribute to them. With a clearer outline of what he was saying in place, I suggest that the new ontology that Merleau-Ponty introduces could help to transform environmental thinking, but that careful argumentation is required to show this.
