Turtle, Beth Fern Faerie, et al., eds., *Earth First! Journal* 17, no. 4 (20 March 1997). Republished by the Environment & Society Portal, Multimedia Library. http://www.environmentandsociety.org/node/7024.

This issue of *Earth First! Journal* is filled with tributes to the deceased Earth First!er Judi Bari. In addition, Stefan Wray calls for ending capitalist dominance in the world and Theresa Kintz discusses ethics and cloning technology.

> One of the arguments used to justify current cloning research is the potential for "saving" endangered species. There has been talk about creating endless supplies of breeding populations of near-extinct species through cloning—a notion that could someday be used to undermine a law like the Endangered Species Act. Why be overly concerned about protecting populations of animals in their natural habitats when you can just make more of them?
