Multimedia Library Collection: Environmental Film Profiles (videos)

Switch

Lynch, Harry. *Switch.* Austin: Arcos Films, 2012. HD, 98 min. https://player.vimeo.com/video/40489581.

> Every energy resource—fossil, nuclear and renewable—is undergoing profound changes. And overall, we're gradually shifting from coal and oil to the energies of tomorrow. This sweeping transition is the subject of *Switch*. But rather than advocate for how it should happen, *Switch* travels the world to discover how it most likely will happen. *Switch* is also about a changing energy conversation. Today, it's polarized and unproductive. *Switch* focuses on practical realities and encourages a balanced understanding. Finally, *Switch* is about changing the way we use energy, to realize the many economic and environmental benefits of efficiency. (Source: Official Film Website)
