MacFadyen, Alan, and G. Campbell Watkins. *Petropolitics: Petroleum Development, Markets and Regulations, Alberta as an Illustrative History.* Calgary: University of Calgary Press, 2014.

> The importance of energy to the functioning of any economy has meant that energy industries are amongst the most regulated of industries. What might appear to be purely private decisions are made within a complex and evolving web of government regulations.
>
> This book provides an economic history of the petroleum industry in Alberta as well as a detailed analysis of the operation of the markets for Alberta oil and natural gas, and the main governmental regulations (apart from environmental regulations) faced by the industry. The tools used within this study are applicable to oil and gas industries throughout the world. (Source: University of Calgary Press)

The Energy, Ecology, and Environment series focuses on Canada's Alberta landscape for international discussions about energy and natural resources, and ecological and environmental concerns.
