> The Symbioses Biosocial Research Network is a professional network of life science, social science, and humanities scholars who are interested in developing cross-disciplinary paradigms and methods to illuminate the mutual interaction of biology and social life in shaping human development, health and disease, and social inequalities. By exchanging scholarship and resources, we strive to support new biosocial collaborations and investigations. (Text from Symbioses)

Symbioses hosts resources in the form of books , syllabi , and multimedia, as well as funding opportunities . It

keeps members up to date through its news and events section and encourages visitors to share their resources as well.
