Munteanu, Nina. *Water is...: The Meaning of Water*. Vancouver: Pixl Press, 2016.

Internationally published author, teacher, and limnologist Nina Munteanu explores one of the most important—and mysterious—substances on Earth: water. Part history, part science, and part philosophy and spirituality, *Water Is...* combines personal journey with scientific discovery that explores water's many "identities" and ultimately our own.

"We can't live without it, so we should start respecting it; this beautifully designed book by a limnologist looks at water from 12 different angles, from life and motion and vibration to beauty and prayer."
—Margaret Atwood, in the *New York Times*, "Year in Reading."

Nina Munteanu served for several years as a senior scientist at various environmental consulting firms and agencies in British Columbia. She currently teaches writing at the University of Toronto.
