Cruz-Torres, María Luz, and Pamela McElwee, eds. *Gender and Sustainability: Lessons from Asia and Latin America*. Tucson: University of Arizona Press, 2012.

> This is one of the first books to address how gender plays a role in helping to achieve the sustainable use of natural resources. The contributions collected here deal with the struggles of women and men to negotiate such forces as global environmental change, economic development pressures, discrimination and stereotyping about the roles of women and men, and diminishing access to natural resources—not in the abstract but in everyday life. Contributors are concerned with the lived complexities of the relationship between gender and sustainability. (Source: University of Arizona Press)
