Moellendorf, Darrel. *Mobilizing Hope: Climate Change and Global Poverty*. New York: Oxford University Press, 2022.

In *Mobilizing Hope: Climate Change and Global Poverty*, Darrel Moellendorf discusses climate change, global poverty, justice, and the importance of political responses, both internationally and domestically, that offer hope. While there are reasons to worry that the era of pervasive human planetary impact, the Anthropocene, could produce terrible global injustices and massive environmental destruction, that need not be so. Moellendorf contends that the work of bringing about a world united in creating sustainable solutions to environmental crises, that values the Earth's natural wonders, and actualizes a vision of economic justice, is the work of mobilizing hope.
