McNeill, J. R. “Chicago’s Temple of Steel: South Works since 1882.” *Springs: The Rachel Carson Center Review*, no. 2 (December 2022).

The new steel mill at the north edge of the remodeled Calumet River’s mouth acquired the name of South Works. From 1889, Illinois Steel, briefly the world’s largest steelmaker, operated it. In

1901, through a series of mergers, it became part of US Steel, then the world's largest company of any kind. In short order, South Works was one of three large, integrated steel works in Chicago, which together turned out about a million tons of steel each year. It came to specialize in "structural" steel: for rail cars made at the nearby Pullman factory; rails; bridge spans; and girders for the skyscrapers that were then beginning to create the jagged Chicago skyline. (From the article)

This article was originally published in *Springs: The Rachel Carson Center Review*. The journal is an online publication featuring peer-reviewed articles, creative nonfiction, and artistic contributions that showcase the work of the Rachel Carson Center and its community across the world.
