Karpouzou, Peggy, and Nikoleta Zampaki, eds. *Symbiotic Posthumanist Ecologies in Western Literature, Philosophy and Art: Towards Theory and Practice*. Studies in Literature, Culture, and the Environment / Studien zu Literatur, Kultur und Umwelt, edited by Hannes Bergthaller, Gabriele Dürbeck, Robert S. Emmett, Serenella Iovino, and Ulrike Plath, vol. 11. Berlin: Peter Lang, 2023.

Through the burgeoning fields of posthumanities and environmental humanities, this edition examines the changing conception of human subjectivity, agency, and citizenship as shaped by the dynamic interplays between nature, technology, science, and culture. The proposed "symbiotic turn," (the awareness of the multitude of interactions and mutual interdependencies among humans, nonhumans and their environment) aspires to explore the complex recompositions of the "human" in the twenty-first century. By organizing and promoting interdisciplinary dialogue at

multiple levels, both in theory and practice, *Symbiotic Posthumanist Ecologies* is suggested as a new narrative about the biosphere and technosphere, which is embodied literarily, philosophically, and artistically. (Source: Peter Lang)
