STANDING FIRM

by Dave Foreman

Friday, November the 13th, 1981, will be a day remembered by Earth lovers as Black Friday, because on that day the Reagan Administration announced the issuing of oil and gas exploration leases in the Capitan Wilderness of the Lincoln National Forest, New Mexico, and plans to offer similar leases in the great Washakie Wilderness of northwestern Wyoming. Proposals are also being pursued by Rape'n'Run Watt to lease other Wilderness Areas for oil and gas, including the Bob Marshall Wilderness in Montana and Maroon Bells, Eagle Nest, Mt. Sneffels plus others in Colorado, and in California. And more recently, the opening of the Gila and Aldo Leopold Wilderness areas.

Upon hearing of the Capitan leasing, New Mexico Congressman Manuel Lujan Jr. (never accused of being an environmental extremist) evidently became pissed and ordered the Lujan Resolution to the House Interior Committee of which he is senior Republican member. His resolution would have utilized a provision of the 1976 Federal Lands Policy and Management Act (FLPMA) giving the committee the power to effect an emergency withdrawal of areas from leasing. Lujan’s Resolution would have withdrawn all areas in the National Wilderness Preservation System from oil and gas leasing as well as buying back the already granted leases in the Capitan Wilderness. Then the oil boys came down on Lujan.

First, Vice-President George Bush (an oil man from Houston) called Lujan and told him to forget about the fund-raising dinner at which Bush was going to speak. Lujan may be a tough race for re-election. Then the Republicans on the Interior Committee led by the anti-environmental fiend from Alaska, Don Young, told Lujan that if he went ahead with his Resolution he would be accused of being an environmental extremist. Only became pissed and offered the Lujan Resolution to the House Interior Committee of which he is senior Republican member. His resolution would have utilized a provision of the 1976 Federal Lands Policy and Management Act (FLPMA) giving the committee the power to effect an emergency withdrawal of areas from leasing. Lujan’s Resolution would have withdrawn all areas in the National Wilderness Preservation System from oil and gas leasing as well as buying back the already granted leases in the Capitan Wilderness. Then the oil boys came down on Lujan.

Lujan may be a tough race for re-election. Then the Republicans on the Interior Committee led by the anti-environmental fiend from Alaska, Don Young, told Lujan that if he went ahead with his Resolution he would be accused of being an environmental extremist.

After hitting some forty communities and colleges from California to Connecticut in a little less than 3 months, Bart (Johnny Sagebrush) Koehler and Dave Foreman, along with business managers Sharon Netherton and Ron Kezar, wound up the Road Show on Thanksgiving Day at a posole/tamale/beer picnic on the banks of the Gila River just south of the Gila Wilderness, America’s first. Sept 29—BOISE, ID—35 folks attended show at city library.

Oct 3 —JACKSON, WY—20 local EF!ers gathered for a strategy session; also a meeting in Jackson by the EF! Circle.

Oct 5—LANDER, WY—36 enthusiastic Landerites attended the EF! show at the University of Montana.

Oct 10—DENVER, CO—Dave debated the head of the Mountain States Legal Foundation at the COSC annual meeting (talk about polarization) and Johnny entertained at the party that evening.

Oct 13 YELLOW SPRINGS, OH—Some 75 environmentalists met with EF! at Antioch College.

Oct 14—ROCHESTER, NY—Two EF! performances in the afternoon to 50 students at the Rochester Institute of Technology (highlighted by the crazed appearance of a nuke saboteur) and later to 20 community folks.

Oct 15—NEW HAVEN, CT—An afternoon gig (delayed 2 hours by a blowout on the NY State Thruway) at the Yale School of Forestry (75 students) followed by a party that evening.

Great folks and wonderful hospitality at every stop, but criss-crossing the nation for three months left the Roadshow crew with ailments from Greasy Spoonitis to Blurry Image.

Show Over, EF! Roadies Unwind

Slighting Sleight

Even before Ed Abbey characterized Ken Sleight (veteran river runner and outfitter from Green River, Utah) in the novel, The Monkey Wrench Gang, Sleight has been the human dartboard for anti-environmentalists in the Green River area.

Shortly after the Sagebrush Patriots’ Rally this 4th of July, at which Ken delivered an impassioned speech, someone snuck onto Ken’s land and dynamited his access bridge (which is over a canal, not the Green River).

Recently, Ken was on an outing in Hanksville and happened to run into a driller who had just lost his rig to an act of suspected sabotage. The driller called Ken and told him, “Listen, Mr. Sleight, I know you didn’t do this, but I know it’s some of those monkey-wrenchers, . . .”
Editor's Notes

Earl Firsters

Susan Watt has decided to take some classes, do some catching up on personal stuff, and redirect her attention to an assortment of Earth First! projects. Susan was the main force behind the TNC Newsletter for the first year of its existence and has done an amazing round of applause for all the work she did. Thank you, Susan.

Now that I have been given the responsibility of churning out this newsletter eight times a year, I can't think of any other activity I'd rather be doing, nor can I think of another organization I'd rather be associated with. I am going to give you nothing but what I can. And if you have any suggestions, remarks, or complaints, don't hesitate to let me know.

As you know, Earth First! is primarily a membership based informal grassroots environmental movement.

Letters to the Editor

Dear EF:

Listen here, Mr. James G. Watt. As we are going to press, we get your recent lead article, "We've Got to Do Some Motherin' ." I read it through from cover to cover, thinking on the part of the writer. It's serious. Its unclear. Verbose and hard to follow.

But you are right. We do need some comic relief these days. I would like to send you $5 to help keep the newsletter eight times a year, I think we are all too well aware of the tremendous amount of material that is written by those who are involved in the Earth First! projects. Susan was truly one of the most talented individuals I have ever met. She did a great job on the newsletter, and I am sure that she would be proud of the work that is being done.

I am sending you $10 on the theory that laughs are also worth money. One lesson?

Helen's poem out loud. The laughs are also worth money.

Sincerely,

Judy Williams

Crawdads in the Slammer

As we move further into the realm of doublespeak, I was glad to see that the Crawdads Alliance for Multinational Repressive Legislation (NCARL) is still pushing for their goal of putting the "hereafter" first. Earth First! projects. Susan was the main force behind the TNC Newsletter for the first year of its existence and has done an amazing round of applause for all the work she did. Thank you, Susan.

Earl Firsters

Editor's Notes

Dear EF:

I am a writer from New York City. Last night I left my heart in Utah and always pleaded to receive the Earth First! Newsletter. Kinda perks up my self-righteous demeanor. You no matter less than the best I can do.

Thank you.

Helen's poem out loud. The ED: "The Gospel According to Watt." Or, "Sayings of Secretary Watt," or maybe "The Night the Lights Went On in Wyoming." The here of this is part of our current Secretariat's concern, and in order to protect myself from complaints of libel or defamation of character, I would like to use direct quotes only from the original source as the lines for this character. In this case, I am not saying that the local has added three verses:

Hey, James Watt, come on out west-huh.
Hey, James Watt, come on out west-huh.
Hey, James Watt, come on out west-huh.
Hey, James Watt, come on out west-huh.

Sincerely,

Muskogee Jack

A Petition to Raze the Dam

While Earth First! advocates peaceful, direct action in the fight to save Mother Earth, there are a few battle tactics which we ought not engage in, such as writing letters, speaking out and circulating petitions. These inspired to do so are encouraged to make up their own petitions using the paragraphs below, and return them to Earth First! We can't wait to march up the Capitol with 20 million signatures.

A PETITION TO THE UNITED STATES CONGRESS

WHEREAS the Lake Powell Dam is the final, single most destructive project to the environment ever undertaken in the United States. It destroyed an incomparable area of red rock canyon wilderness. We, the undersigned citizens of the United States of America, hereby petition our elected representatives in Congress assembled to pass legislation directing that the draining of Lake Powell be used to allow the Colorado and San Juan Rivers to cleanse their canyons and begin to recreate their wilderness.

The Oil and Gas War on Wilderness is EARTH FIRST!'s number one issue for the Rocky Mountain West; the Gros Ventre is the first battle in that War. Next summer, local EF'ers in Jackson, with support from EF'ers all over America, will occupy the access route into Little Granite Creek and block any attempts by anyone to build a road or put in a drilling rig. THEY WILL NOT PASS.

Gros Ventre is an OMDB Issue, and EF! hopes the Gros Ventre Range in northwest Wyoming will become a national wilderness. We will occupy the Gros Ventre from snowmelt until snowfall next summer to stop Wait and Getty. The focal point of the occupation will be the 4th of July when the Second Annual Sagebrush Patriot Rally takes place at Little Granite Creek, featuring Ed Abbey, Johnny Watchman, Howie Walkie, Dave Foreman, and others.

Plan your vacation next summer when the Gros Ventre:ом! Wilder­

The Wyoming Wilderness Act includes 2 million acres of Little Granite Creek and tributaries to the Gros Ventre River.

We want to protect this 10 million acre wilderness which is similar to the one proposed by涉及到the USFS for the Grand Canyon of the Colorado River. A few roads and developments remain. We will use this area as a test for a more detailed work on each. All acreages are approximate.

1. Chihuahuan Desert Preserve: Expand the National Park South to the Mexican border and carve out a 5 million acre wilderness.
3. Southern Appalachian Preserve: Expand Great Smoky Mountains National Park into a 10 million acre wilderness.
4. Everglades Preserve: Expand the park north to Lake Okeechobee and south to the Everglades south to the Kenansaw.
5. Black Hills Preserve: Preserve 1 million acres of old growth forest and open prairie.
10. Bear Creek Preserve: 2 million acres of the Bear Creek Basin.
12. Zion National Park: 2 million acres of the Zion National Park.
17. Yellowstone: 2 million acres of the Yellowstone.
19. Missouri Breaks: 2 million acres of the Missouri Breaks.
23. Yellowstone: 2 million acres of the Yellowstone.
24. Yosemite: 2 million acres of the Yosemite.
26. San Juan: 2 million acres of the San Juan.
30. Mojave: 2 million acres of the Mojave.
31. Sierra Nevada: 2 million acres of the Sierra Nevada.
33. North Fork: 2 million acres of the North Fork.
36. Sierra Nevada: 2 million acres of the Sierra Nevada.
37. San Juan: 2 million acres of the San Juan.
39. San Juan: 2 million acres of the San Juan.
40. Black Hills: 2 million acres of the Black Hills.
41. San Juan: 2 million acres of the San Juan.
42. Black Hills: 2 million acres of the Black Hills.
43. San Juan: 2 million acres of the San Juan.
44. Black Hills: 2 million acres of the Black Hills.
45. San Juan: 2 million acres of the San Juan.
47. San Juan: 2 million acres of the San Juan.
49. San Juan: 2 million acres of the San Juan.
51. San Juan: 2 million acres of the San Juan.
53. San Juan: 2 million acres of the San Juan.
55. San Juan: 2 million acres of the San Juan.
57. San Juan: 2 million acres of the San Juan.
59. San Juan: 2 million acres of the San Juan.
61. San Juan: 2 million acres of the San Juan.
63. San Juan: 2 million acres of the San Juan.
64. Black Hills: 2 million acres of the Black Hills.
65. San Juan: 2 million acres of the San Juan.
67. San Juan: 2 million acres of the San Juan.
69. San Juan: 2 million acres of the San Juan.
71. San Juan: 2 million acres of the San Juan.
73. San Juan: 2 million acres of the San Juan.
75. San Juan: 2 million acres of the San Juan.
77. San Juan: 2 million acres of the San Juan.
79. San Juan: 2 million acres of the San Juan.
81. San Juan: 2 million acres of the San Juan.
83. San Juan: 2 million acres of the San Juan.
85. San Juan: 2 million acres of the San Juan.
87. San Juan: 2 million acres of the San Juan.
89. San Juan: 2 million acres of the San Juan.
91. San Juan: 2 million acres of the San Juan.
93. San Juan: 2 million acres of the San Juan.
95. San Juan: 2 million acres of the San Juan.
97. San Juan: 2 million acres of the San Juan.
99. San Juan: 2 million acres of the San Juan.

We will keep a watchful eye on the activities of the BLM and Forest Service, and we will not hesitate to take direct action if necessary. We will support direct action by those who are willing to risk their lives to save our wilderness. We will continue to fight for a healthy and viable wilderness for the people of the United States.

EARTH FIRST! is currently drafting legislation that will require, among other things:
1. The Wilderness Act to be amended to remove Section 4(g)(2) which would withdraw all areas in the National Wilderness Preservation System from mineral entry and oil & gas leasing.
2. The Habitat Preservation Act to be amended to withdraw FLPMA cells from all areas in the RARE II areas recommended by the U.S. Forest Service for permanent protection.

If you would like to help with this campaign contact us at Dave Foreman. We need your help to make our campaign successful.

Earth First! is committed to protecting the wilderness for the benefit of all Americans. We will not be deterred by the power of the oil and gas industry. We will continue to fight for a healthy and viable wilderness for the people of the United States.

EARTH FIRST! is committed to protecting the wilderness for the benefit of all Americans. We will not be deterred by the power of the oil and gas industry. We will continue to fight for a healthy and viable wilderness for the people of the United States.
Dave Foreman unleashes his tongue during this summer's 4th of July "Sagebrush Patriots' Rally" as he exposes the REAL traitors to the land, the "Sagebrush Rebels," and the corporate/industrial complex behind them.

Oct. 16 - WILLIMANTIC, CT—25 folks at a local church.
Oct. 17 - WASHINGTON, DC-An EF! party attended by over 30.

Oct. 21 - STAUNTON, VA—75 really enthusiastic and hard-drinking eco-crazies at an evening college presentation.
Oct. 22 - HIGHLANDS, NC—a dinner, party, and strategy session with 20 local conservationists.
Oct. 24 - LITTLE ROCK, ARK—a benefit concert for EF! attended by over 200 people.

Part of the mock jury trial which found Watt guilty of High Crimes Against the Environment. "Rape & Run" Watt was inside a building to the near at the time, trying to chum it up with the guvs. Sept. 11, '81.

Dave and Johnny appeared at an evening gig at the Univ. of New Mexico. A singing press conference earlier in the day.

U of Arizona—over 200 participants.
Nov. 12 - SILVER CITY, NM—35 folks at a picnic and sing along.
All of us involved with the Road Show (Karen, Sharon, Ron, Bart, and Dave) would particularly like to thank Karen Tanner, Sharon Netherton, and Ron Kezar for holding them to Karen Tanner, 1640 Davidson, Reno, NV 89509.

As the EF! Anti-Watt rally in Jackson began, twenty or so Pro-Watt demonstrators tried to drown us out with the horns on their 4-wheel landrovers. Ten minutes later, however, they gave up as the singing demonstrators won out.
"But'nt Sparks" M.t:. of the Moab Mutant Contest, introduces radiant
contestants to the crowd at the Poplar Place.

Radioactivity takes its toll. Moab EF'ers sponsored "Mutant Contest" in conjunction with the EF! Roadshow there. These "mutants" devour a plate of the EF! Benefit Dinner, offered prior to the festivities.

"Burnt Sparks" M.C. of the Moab Mutant Contest, introduces radiant contestants to the crowd at the Poplar Place.

Earth First! Macho Night in Jackson, Wy. Howie Wolke grins as he prepares to beat other EF'ers at arm wrestling. Howie surprised James Watt at the EF! demonstration outside the Western Governors' Conference when he reached over a Secret Service agent, took Watt's hand and said, "Mr. Secretary, I'm Howie Wolke and I organized the Anti-Watt rally over there."

You and Earth First!

EARTH FIRST! has experienced a tremendous growth of new supporters during this fall due to the Road Show and the article in the PROGRESSIVE Magazine. We'd like to welcome all you new folks most heartily and hope to see you at future EF! gatherings (plan on the Gros Ventre). Clearly, the heart and soul of EARTH FIRST! is going to be its local groups and supporters. EF! will survive as a movement and a cause only if EF'ers across the nation get together locally to fight on their own issues and come together nationally to confront the beast of industrial civilization when necessary.

In the future, the EF! Newsletter will regularly list addresses for local EF! groups or for local EF! contact persons. This will allow EF'ers to get in touch with others in their areas. If you would like to be listed as a local contact for EF! or for a local group, please send your name and address to EF! or for a local group, contact Dave Foreman. If you want to be active locally, cont'd pg 6, col 3

In less than one year, Earth First! has grown in membership from five to over 2,000.

Johnny Sagebrush at Jackson, Sept 11: "The mighty forces of the Earth, now... Will resist the beast this time/ And your children, will stand strong, now/ Keep together and hold the line." (From Will Our Mother Be Unbroken?)

In less than one year, Earth First! has grown in membership from five to over 2,000.

Story-telling at the Round River Rendezvous the day before the Sagebrush Patriots' Rally.

Sagebrush Patriots at the 4th of July rally in Arches Natl. Park.

**The Open Page**

A DISCUSSION-ORIENTED FORUM FOR "ECO-ACTIONS AND TACTICS"...NONE OF WHICH IS EARTH FIRST! OR THIS NEWSLETTER NECESSARILY SUPPORTS OR CONDONEs.

Although Earth First! is a political action group, our actions are primarily in the form of non-violent civil disobedience and without their approval First does not advocate or condone violence or sabotage. (Why fight the beast while it sleeps when we can ridicule it and simply stare it in the way?)

However, we have decided to run a regular column of "eco-tactics," which are on the following pages.

---

**EARTH FIRST! HELP WANTED**

An ambitious lawyer or moral leader is needed to defend the Earth First! suit in court. Consider the deprivations of right-wing, fundamentalist world.

**Situation:** In many states, (FL, CA, IL, LA, KY, MN, NY, Wash., and WA, among others), "scientific creationists" are pushing legislation which would render the biblical version of creation to be taught in the public schools, so said: equal to evolution.

We believe that this doctrine is a threat to science and to the teaching of evolution, and that it is being used to promote the political goals of right-wing, fundamentalist religious groups.

We recommend that you contact your local or national Earth First! chapter to discuss the possibility of taking legal action.

---

**Situation:** In many states, organizations are attempting to force the use of the word "creation" in the public schools.

We believe that this legislation is a threat to science and to the teaching of evolution, and that it is being used to promote the political goals of right-wing, fundamentalist religious groups.

... and this was because of the increased demand for nuclear fuel. Uranium mining also plays a significant role in the environmental and economic landscape. The increased demand for uranium has led to concerns about the safety and health impacts of mining operations. Additionally, the extraction of uranium from the Earth's crust can lead to the release of radioactive substances that can contaminate water and soil, posing a significant risk to human and ecological health.

The ecological action group, Greenpeace, which recently turned ten years old and is an organization, two months ago posted "Danger - Radioactive" signs along I-80 through Utah to draw attention to the fact that high-level wastes have been trans­ported along that route. The posting of the signs coincided with the opening of the new season here in Utah, and there was initial speculation that the prank was designed to fend off hunters and trappers later. However, the motives became clear. Authorities threatened lawsuits and fines, but in no time the entire action was downplayed by the press. The song that became the better known was the unspoken response. Greenpeace officials say that they're going to continue their efforts in the coming year towards blocking the proliferation of the nuclear industry, all the way from uranium mining to waste disposals and nuclear arms. A few well-timed world headlines ten years ago when they tried to block the nuclear test at Amchitka, so it is early institution that would mark the occasion and ring in the next decade with such a caper.
